EDUCATION

Queen's University

Kingston, ON

Honours Bachelor of Computing, Software Design Specialization

May 2027

Relevant Course: Data Structures & Algorithms (A+), Statistics (A+), Database Management (A-), Data Science (A)

TECHNICAL SKILLS

Languages: Python, SQL, Java, Go, C#, C++

Frameworks & Platforms: GCP, AWS (S3, EC2, Bedrock, DynamoDB), Airflow, FastAPI, PostgreSQL, Cassandra

Developer Tools: Git, Visual Studio, Chef, Puppet, VS Code, JIRA, Confluence, PowerBI, Tableau

Certifications: AWS Certified Cloud Practitioner (July 2025), AWS Certified Data Engineer (Nov 2025)

EXPERIENCE

Data Analytics Engineer Intern

May 2025 – April 2026

Scotiabank

Toronto, ON

- Integrated **AI-driven automation** into Airflow-orchestrated PySpark and BigQuery pipelines by leveraging **LLM-based agents** for DAG debugging, failure analysis, and pipeline code generation, **reducing manual troubleshooting effort**.
- Architected and optimized scalable ETL pipelines on GCS + BigQuery using PySpark on Dataproc to process **500GB+** of daily financial data, **reducing compute costs by 25%** and **pipeline latency by 30%**, enabling faster, **data-driven financial reporting** and cross-functional decision support.
- Productionized **15+ BigQuery tables** by resolving transformation logic defects across **50M+ financial records**, strengthening data governance, improving **operational decision-making** across cross-functional teams.

Solutions Engineer Intern

May 2023 - April 2024

FGF Brands

Toronto, ON

- Designed secure API integration solutions for **35+** vendors and 3PL partners, normalizing diverse EDI formats and delivering **scalable, production-grade** cloud integration aligned with business requirements.
- Architected scalable Azure microservices system using Azure Logic Apps, Functions, and Cosmos DB to automate EDI-to-SAP IDOC workflows, processing **1,500+ orders** daily, **reducing manual workload by 40%**, and accelerating enterprise order fulfillment.
- Engineered 20+ EDI/XML data transformation pipelines in C# (.NET) and XSLT with unit testing and CI/CD via Azure DevOps, **improving data accuracy** and **system reliability**.

PROJECTS

EchoNote | *Next.js, TypeScript, AWS(Bedrock, Lambda, S3, DynamoDB), MS Teams API*

Nov 2025

- Built an agentic AI meeting assistant adopted by **75+ users**, transforming meeting recordings into structured summaries and actionable next steps, reducing manual documentation and accelerating post-meeting execution.
- Architected a scalable serverless AWS microservices pipeline using **Lambda, DynamoDB, and S3**, integrating Microsoft Teams API and Amazon Bedrock Agents for real-time transcription and context-aware AI generation.

DataDream | *React JS, Python, AWS (Bedrock, Lambda, S3, DynamoDB), Streamlit*

May 2025 - Jul 2025

- Built an AI-powered synthetic data generation platform on AWS using React, FastAPI, and cloud-native services to address data insufficiency in model training, generating datasets with 85% distributional similarity.
- Architected a serverless synthetic data generation platform using AWS **Lambda, S3, DynamoDB, and Bedrock**, implementing real-time quality validation to preserve **80%+** inter-column correlations..

LEADERSHIP

Director of Design - Consulting

Sep 2024 – April 2025

QMIND - Queen's Machine Learning Club

Kingston, ON

- Directed Consulting Pod of **20 students** delivering **4 client-partnered projects** with firms in data, healthcare, and law, managing recruitment, project execution, and stakeholder relations to ensure industry-grade deliverables.
- Lead a 5-person team developing a customizable content-repurposing agent, working with data consulting firm Project X.
